

THARUN KUMAR REDDY B

Data Scientist — Machine Learning Engineer — MLOps Specialist

+91-7993663637 btharunkumarreddy39@gmail.com LinkedIn Github

PROFESSIONAL SUMMARY

Data-driven professional specializing in Data Science, Machine Learning, and MLOps with hands-on experience across the entire AI lifecycle — from data engineering to model deployment. Skilled in Python, Pandas, scikit-learn, and cloud-based platforms like Google Vertex AI for scalable analytics and automation. I have developed end-to-end ML pipelines, performed feature engineering, and implemented statistical and predictive models. Adept at leveraging LangChain and LangGraph for Generative AI solutions and integrating insights into business decisions with clear visualizations and automation pipelines.

TECHNICAL SKILLS

- Languages:** Python, SQL
- Frameworks:** LangChain, LangGraph, MCP(Model Context Protocol), Kubeflow, FastAPI, Flask, Streamlit, Tensorflow, Keras
- Tools:** Vertex AI, GCP(Google Cloud Platform), BigQuery, Cloud Storage, Docker, Git, Pub/Sub, Jira, Confluence
- Libraries:** NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, Great Expectations, Sweetviz
- Additional Skills:** HTML, CSS, JavaScript, Bootstrap, MLflow, Basics of Java

PROFESSIONAL EXPERIENCE

Data Scientist

Tata Consultancy Services

Oct 2023 – Present

Bangalore, India

- Developed and deployed machine learning models for business use cases improving efficiency and accuracy.
- Built and maintained end-to-end ML pipelines using Python, Pandas, Kubeflow and scikit-learn.
- Implemented AI-driven workflows in Google Cloud Vertex AI including AutoML, custom models, and orchestration.
- Used GCP services (BigQuery, Cloud Storage, Pub/Sub) for scalable data processing.
- Developed REST APIs using FastAPI and Flask to serve ML models in production.
- Created front-end dashboards with HTML, CSS, and JavaScript for data visualization and interaction.
- Performed exploratory data analysis and visualization using Matplotlib and Seaborn.
- Developed scalable pipelines using Kubeflow Pipelines and automated them via Cloud Scheduler and Pub/Sub.
- Improved model performance through algorithm optimization and drift detection.
- Contributed to forecasting model POCs to enhance operational productivity.
- Built multi-agent AI systems enabling autonomous decision-making and chatbot interaction.
- Collaborated cross-functionally in Agile environments ensuring timely delivery of AI solutions.

PROJECTS

Retrieval-Augmented Generation (RAG) Chatbot

Agentic AI Project

Aug 2025 – Nov 2025

Python, LangChain, LangGraph, Streamlit

- Built a RAG-based chatbot for contextual Q&A using GROQ and Hugging Face APIs.
- Enhanced information retrieval accuracy by 35% using real-time Tavily API integration.

EDUCATION

Anantha Lakshmi Institute of Technology and Sciences (ALITS)

Bachelor of Technology in Computer Science and Engineering

Anantapur, India

Aug 2019 – May 2023(CGPA-8.57)

CERTIFICATIONS

- Google Cloud Associate Cloud Engineer (ACE)
- Google Cloud Generative AI Leader
- Salesforce AI Associate
- Agentic AI Bootcamp (LangChain and LangGraph)
- AWS Agentic AI Essentials Certified

ACHIEVEMENTS

- Awarded On-the-Spot Recognition for developing an automated ML pipeline with measurable business impact.
- Recognized for dedication, time management, and continuous skill development.
- Recognized for adaptability and proactive contribution to team success.
- Acknowledged by clients for introducing simulation workflows that improved prediction reliability and decision-making efficiency.

LANGUAGES

- English (Professional Proficiency)
- Telugu (Native)
- Kannada (Conversational)
